CipherLab supports RoHS and WEEE

June 20, 2006

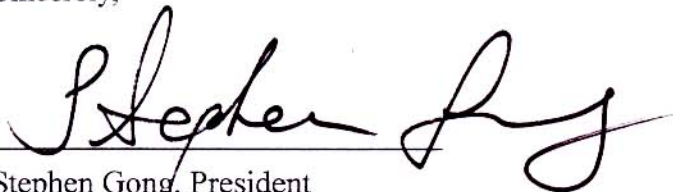

Dear valuable partner,

On behalf of CipherLab, we have committed ourselves to supporting the EU directive on both the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS) and Waste Electrical and Electronic Equipment (WEEE).

We are willing to take initiatives to reduce the designated hazardous material in CipherLab's electrical and electronic products. All the existing products are being reviewed and will transform into RoHS compliance after July 1, 2006.

Please contact the CipherLab sales representative servicing your company for ordering information.

Sincerely,

Stephen Gong, President
